

PUBLICATIONS: KEYSER, D.O.

Keyser, D.O. The effects of pre-cooling on warm water performance in humans. In preparation.

Turner-Keyser, Tracey and **Keyser, David**. Getting Therapized. In: Inner Change Magazine, www.innerchangemag.com, due out 2009.

Turner-Keyser, Tracey and **Keyser, David**. Once Upon a Time. In: Inner Change Magazine, www.innerchangemag.com, 2009.

Turner-Keyser, Tracey and **Keyser, David**. When the Child is a Stranger. In: Inner Change Magazine, www.innerchangemag.com, 2008.

Deuster, P.A. and **Keyser, D.O.** Basics in Exercise Physiology. In: Sports Medicine: Just the Facts, McGraw Hill Pub, 2005.

M.J. Swiergosz, **D.O. Keyser** and W.A. Koller. Melatonin does not provide protection against hyperbaric oxygen (HBO) induced seizures. Naval Medical Research Center Technical Report #2004-001, September 2004.

Ravindran, A., Miwa, M., Koller, W.A., **Keyser, D.O.**, Auker, C.R., and McCarron, R.M. Hyperoxia inhibits potassium channels in rat pheochromocytoma (PC12) cells. 2004 (submitted).

Chavko, M., Nadi, N.S., and **Keyser, D.O.** Activation of BDNF mRNA and protein after seizures in hyperbaric oxygen: implications for sensitizations to seizures in re-exposures. Neurochem Res. 27(12): 1649-53, 2002.

Chavko, M., Xing, G., and **Keyser, D.O.** Increased sensitivity to seizures in repeated exposures to hyperbaric oxygen: Role of nitric oxide synthase activation. Brain Res., 900(2): 227-233, 2001.

Kayar, S.R. and **Keyser, D.O.** Recent advances in US Navy diving biomedical research: decompression sickness, oxygen toxicity and thermal stress. In: 15th Meeting of the US-Japanese Cooperative Program in Natural Resources (UJNR), Panel on Diving Physiology, Tokyo, Japan, Dec 4-5, 1999, 31-37, 2000.

Kayar, S.R. and **Keyser, D.O.** Recent advances in US Navy diving biomedical research: Decompression sickness, oxygen toxicity and thermal stress. Proc. UJNR: 31-37, 1999.

Pellmar T.C., **Keyser D.O.**, Emery C., and Hogan J.B. Electrophysiological changes in hippocampal slices isolated from rats embedded with depleted uranium fragments. Neurotoxicology 20(5):785-792, 1999.

Keyser, D.O. and Pellmar, T.C. Regional differences in glial cell modulation of synaptic transmission. *Hippocampus*, 7(1): 73-77, 1997.

Pellmar, T.C., Gilman, S.C., **Keyser, D.O.**, Lee, K.H., Lepinski, D.L., Livengood, D.L. and Myers, L.S. Reactive oxygen species on neuronal transmission. *Ann. NY Acad. Sci.* 738: 121-129, 1995.

Keyser, D.O. and Pellmar, T.C. Synaptic transmission in the hippocampus: critical role for glial cells. *GLIA*, 10(4): 237-243, 1994.

Keyser, D.O. and Alger, B.E. Arachidonic acid modulates hippocampal calcium current via protein kinase C and oxygen radicals. *Neuron*, 5(4): 545-53, 1990.

Buterbaugh, G.G., Michelson, H.B. and **Keyser, D.O.** Status epilepticus facilitated by pilocarpine in amygdala-kindled rats. *Exp. Neurol.* 94(1): 91-102, 1986.

Abstracts:

Armstrong, D.W., Herzig, T.C., **Keyser, D. O.**, Pruschki, D., and Deuster, P.A. Correlates of peak body temperature during warm water (37°C) swimming. *ACSM Abstr.*, 2003.

Ravindran, A., **Keyser, D.O.**, and Nadi, S. Hyperoxia potentiates NMDA and AMPA receptor channels in cultured rat hippocampal neurons. *Soc. Neurosci. Abstr.*, 2002.

Keyser, D.O., Miwa, M., Koller, W.A., McCarron, R.M., and Ravindran, A. Hyperoxia and redox reagents inhibit potassium channels in PC-12 cells. *Soc. Neurosci. Abstr.*, 28, 2001.

Nadi, N.S., Koller, W.A., Werner, J.K., and **Keyser, D.O.** The glutamate transporter of C6 glioma cells is inhibited by exposure to hyperbaric oxygen. *Soc. Neurosci. Abstr.*, 27, 2001.

Ravindran, A., Pellmar, T. C., and **Keyser, D. O.** Effect of oxidizing and reducing agents on nicotinic acetylcholine receptor channels. *Soc. Neurosci. Abstr.*, 26, 2000.

Chavko, M., Xing, G-Q., Zhang, L-X., **Keyser, D.O.**, and Auker, C.R. Expression of neuronal nitric oxide synthase mRNA is increased after seizures induced by hyperbaric oxygen. *Soc. Neurosci. Abstr.*, 25, 1999.

Keyser, D.O., Ahlers, S.T., Switzer, R.C., and Auker, C.R. Pathological consequences of acute hyperbaric oxygen exposure in the CNS. *Soc. Neurosci. Abstr.*, 24, 1998.
